25X1

1. On 2 July 1952 a line of eight wheel (2 truck) flat cars was observed standing on a siding at Radna, about 25 kms. east of Arad on the main Curtici-Bucharest line.

2. Each flat car was judged to be about 60 feet long and appeared to be new, the sides being painted with a single-row of alternate black and white squares.

25X1

4. Two pairs of vertical bars were placed about 10 feet from the ends and a single piece of chain hung laterally between each pair.

5. A later look at one old specimen of apparently the same type revealed that the truss-rods were massive and deep, and met at the center to form a pyramid.

6. A rough sketch is attached at Appendix "A".
